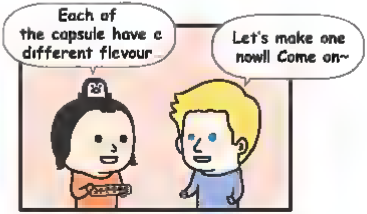
After Drinking Coffee

A little while ago,

I got a coffee machine as a present from my sister's fiancée, Gomkoko.



Mev normally didn't have much interest in coffee

As a new machine was in our home,. . .

... he seemed very into coffee

On top of that,...

... as he thought the coffee tasted good,

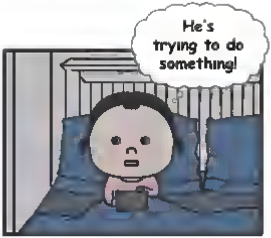
... or he liked playing with the machine, ...

... he drank 3 or 4 coffees a day for a few days.

He seemed over excited.

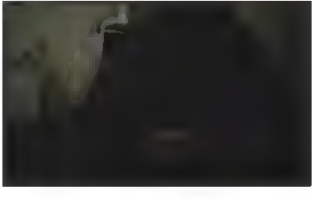
About 3 days after
we'd got the coffee machine.

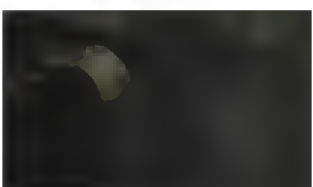
I heard clapping.



I noticed that
Mev was about to do something.

So I quickly turned
my tablet's camera on to film him.





This excitement disappeared
after a week finally
